**SHARE THE KEY
TO A BRIGHT FUTURE.**

Studies show that Financial Education should start early at both home and school.

80% of parents want to teach their children about the basics of banking and managing money, but most aren't confident about how to do it. Here's what you CAN do to help!

Will you let children drive a car without proper driving lessons?

Why let kids enter a complex financial world without any financial education?

Financial ignorance will be a disaster, especially when they will be fresh graduates entering tomorrow's workforce.

That's why we bring you a research-based, student-friendly book that will help children become financially literate and avoid making costly mistakes in future.

Did you know?

- Financial literacy is now one of the **top priorities** for most nations.
- India is home to **18%** of the world's population
- **76%** of Indian adults lack proper understanding of basic finance concepts
- Financial illiteracy will lead to **heavy debt** and poor credit
- On the other hand, financially savvy people are better savers, avoid burdensome debt and are more alert of their credit score.

Give your schools, libraries, bookstores an added competitive advantage!

Financial Literacy for Kids cover basic aspects of financing — savings accounts, debit cards, credit cards, payment systems, and more! A book—first of its kind that will give you an edge in an increasingly competitive world. Smart teachers everywhere have begun to introduce this book in their classroom.

This book will be an invaluable resource for parents, caregivers, educators and professionals teaching children and teenagers.
